

In Case Of A Fire

Protecting yourself and your family

- Install smoke detectors and familiarize your family with the sound of the alarm.
- Plan an escape route from your home. If possible, every room should have two escape routes.
- Remember that smoke and heat rise. When you encounter smoke, crawl on the floor where the air is cleaner.

Protecting your property

- Make sure your roof is constructed with fire resistant materials.
- Mark the entrance to your property clearly so that firefighters can easily locate your home.
- Keep a fire extinguisher in your home.
- Landscape your yard with fire-resistant plants. Check with your local fire department or landscapers to determine which plants are safe. Clear all other vegetation up to at least 30 yards from your home.
- Make an inventory of your possessions to help facilitate the claim filing process if your belongings are damaged or destroyed.
