

Hail

Hail causes about \$1 billion dollars in damage to crops and property each year, according to the National Oceanic Atmospheric Administration (NOAA). Events involving wind, hail or flood accounted for \$16.1 billion in insured catastrophe losses in 2013 dollars from 1994 to 2013 (not including payouts from the National Flood Insurance Program), according to ISO.

There were 5,457 major hail storms in 2013, according to [statistics](#) [1] culled from NOAA's Severe Storms database, with the largest number of severe hail storms occurring in May (1,376 storms), June (1,145 storms), and July (750 storms). Texas had the largest number of severe hail events in 2013, followed by Kansas, Nebraska, Oklahoma, and South Dakota.

The U.S. Weather Services posts detailed information on severe storm events, including hail, tornadoes and wind. 2013 data on the number of tornadoes are posted [online](#) [1]. Historical and current data, including damages, are posted [here](#) [2]. NOAA has a "search by state" [database](#) [3].

Damage caused by wind and hail cost State Farm and its policyholders more than \$3.9 billion in 2012, according to an April 2013 [analysis](#) [4] by the insurer. Texas was the state with the most wind/hail losses, followed by Illinois, New York, Ohio, Missouri, Tennessee, Indiana, New Jersey, Kentucky and Colorado.

TOP FIVE STATES FOR MAJOR HAIL EVENTS, 2013 (1)

Rank	State	Number of hail events
1	Texas	651
2	Kansas	504
3	Nebraska	466
4	Oklahoma	411
5	South Dakota	360
	United States	5,457

(1) One inch in diameter or larger.

PROPERTY HAIL CLAIMS

A [report](#) [8] issued by Verisk Insurance Solutions in August 2014 showed that over the 14 years from 2000 to 2013 U.S. insurers paid almost 9 million claims for hail losses, totaling more than \$54 billion. Most of those losses 70 percent occurred during the past six years. In addition to the higher number of claims, the average claim severity during the past six years was 65 percent higher than from the period 2000 through 2007.

Verisk's report ranks states from 2000 to 2013 by annual claim severity and by annual claims loss per year. When ranked by claim severity, not one of the states in "hail alley" Nebraska, Colorado and Wyoming is represented. The second ranking, by average claims loss per year, is a better representation of states that are more likely to have large hail losses and includes Oklahoma, Illinois and Kansas, which are typically known as hail states. Only two states, Minnesota and Ohio, are represented in both the chart for average claim severity and for average claims loss per year.

TOP TEN STATES FOR HAIL LOSSES, 2000-2013 (1)

Rank	State	Average claim severity	Rank	State	Average cl
1	Oregon	\$9,1001		Texas	
2	Idaho	8,6002		Minnesota	
3	Florida	7,9003		Oklahoma	
4	Connecticut	7,6004		Colorado	
5	Washington	7,5005		Illinois	
6	Minnesota	7,4006		Ohio	
7	New Jersey	7,0007		Georgia	
8	Wisconsin	6,7008		Tennessee	
9	Ohio	6,7009		Kansas	
10	Virginia	6,60010		Indiana	

Source: Verisk Insurance Solutions, Property Hail Claims in the United States: 2000-2013 [8], August 2014.

- Texas, which ranked first for average losses per year, has accounted for more than 20 percent of all hail claim losses since 2000.
- Minnesota had the second highest average annual loss since 2000 and the sixth highest average claim severity.
- The Verisk report found that there was a clear increase in the number and severity of hail claims during the past six years.
- 2011 was the first year to break the 1 million hail claims mark.

AUTOMOTIVE CLAIMS

A 2012 Highway Loss Data Institute (HLDI) study quantified hail-related claims under automobile insurance comprehensive coverage, based on an analysis of National Oceanic and Atmospheric Administration and HLDI data. The results show that the number of comprehensive claims for hail damage more than doubled in 2011, compared with the previous three years. There were 5.9 claims per 1,000 insured vehicle years in 2011, compared with 2.9 in 2008 and 2009 and 2.7 in 2010. The study is posted at http://www.iihs.org/research/topics/pdf/hldi_hail_bulletin.pdf [9].
