This PowerPoint report, presented by Steven Weisbart, senior vice president and chief economist of the Insurance Information Institute at the 9th Annual National Workers? Compensation Insurance ExecuSummit, identifies and discusses six mega-trends that will affect the workers compensation insurance market. The trends are an exposure base that is growing but with a different mix of risks, continuing improvements in workplace safety, inflation, low investment returns, an aging workforce and the obesity epidemic. A discussion of the first trend includes an industry and occupation growth analysis, noting that the healthcare, education and services industries will lead growth in the industry.

Please click on the file name below to view the presentations. Once open, you can choose "file" from your menu and then save the PowerPoint presentation to your disk. The presentation also is available in Adobe Acrobat format. The Adobe Acrobat file is smaller and faster to download. However, you do need the appropriate software to view.

You can download Adobe Acrobat Reader, free of charge, from the Adobe website ( https://www.adobe.com/products/acrobat/readstep.html).

Note: Printer fonts may vary by browser and version of Adobe Reader.
