This PowerPoint report, presented in Phoenix, AZ by Robert Hartwig, president of the Insurance Information Institute, to the Liberty Mutual President's Club analyzes factors that will affect the property/casualty (P/C) insurance market in the coming year, especially in the workers compensation line. These factors include an improving economy, uncertainty as to whether the labor market will grow robustly and the potential for a recovery in the nation's manufacturing sector. Presidential politics and the P/C insurance industry are discussed in a section that focuses on how the outcome of the election might affect the Affordable Care Act and healthcare reform, implementation of the Dodd-Frank Act, composition of the Financial Stability Oversight Council, key committee positions and the leadership, staffing, agenda and budget of the Federal Insurance Office. The presentation also includes a summary of P/C financial performance and discussions of what is necessary for the market to turn and factors that contribute to the underwriting cycle.
