This PowerPoint report, presented by Robert Hartwig, president of the Insurance Information Institute, at the AEGIS 2014 policyholders? conference, begins with a property/casualty (P/C) insurance industry financial update that notes that while 2013 saw a welcome respite from near-record catastrophe activity it is too soon to predict if the same will be true this year. A lengthy update on U.S. and world catastrophe losses reports that increasingly extreme weather, including the polar vortex and wildfires, has proven costly to utilities and insurers alike. A section on energy notes that the U.S. is becoming a powerhouse in the sector, which will fuel P/C exposures.

Please click on the file name below to view the presentations. Once open, you can choose "file" from your menu and then save the PowerPoint presentation to your disk. The presentation also is available in Adobe Acrobat format. The Adobe Acrobat file is smaller and faster to download. However, you do need the appropriate software to view.

You can download Adobe Acrobat Reader, free of charge, from the Adobe website (https://www.adobe.com/products/acrobat/readstep.html).

Note: Printer fonts may vary by browser and version of Adobe Reader.
