P/C Insurance Industry Financial Overview

**Profit Recovery in 2012 After
High CAT Losses; Ultimate
Impact of Sandy Still Unclear**

P/C Net Income After Taxes 1991–2013:Q1 (\$ Millions)

*ROE figures are GAAP; ¹Return on avg. surplus. Excluding Mortgage & Financial Guaranty insurers yields a 9.7% ROAS in 2013:Q1, 6.2% ROAS in 2012, 4.7% ROAS for 2011, 7.6% for 2010 and 7.4% for 2009.

Sources: A.M. Best, ISO, Insurance Information Institute

Profitability Peaks & Troughs in the P/C Insurance Industry, 1975 – 2013:Q1*

*Profitability = P/C insurer ROEs. 2011-13 figures are estimates based on ROAS data. Note: Data for 2008-2013 exclude mortgage and financial guaranty insurers.

Source: Insurance Information Institute; NAIC, ISO, A.M. Best.

A 100 Combined Ratio Isn't What It Once Was: Investment Impact on ROEs

Combined Ratio / ROE

A combined ratio of about 100 generates an ROE of ~7.0% in 2012, ~7.5% ROE in 2009/10, 10% in 2005 and 16% in 1979

Combined Ratios Must Be Lower in Today's Depressed Investment Environment to Generate Risk Appropriate ROEs

* 2008 -2012 figures are return on average surplus and exclude mortgage and financial guaranty insurers. 2012 combined ratio including M&FG insurers is 103.2, 2011 combined ratio including M&FG insurers is 108.1, ROAS = 3.5%.

Source: Insurance Information Institute from A.M. Best and ISO data.

The Strength of the Economy Will Influence P/C Insurer Growth Opportunities

**Growth Will Expand Insurer Exposure
Base Across Most Lines**

US Real GDP Growth*

Real GDP Growth (%)

Demand for Insurance Continues To Be Impacted by Sluggish Economic Conditions, but the Benefits of Even Slow Growth Will Compound and Gradually Benefit the Economy Broadly

* ■ Estimates/Forecasts from Blue Chip Economic Indicators.

Source: US Department of Commerce, Blue Economic Indicators 7/13; Insurance Information Institute.

Real GDP by State Percent Change, 2012: Highest 25 States

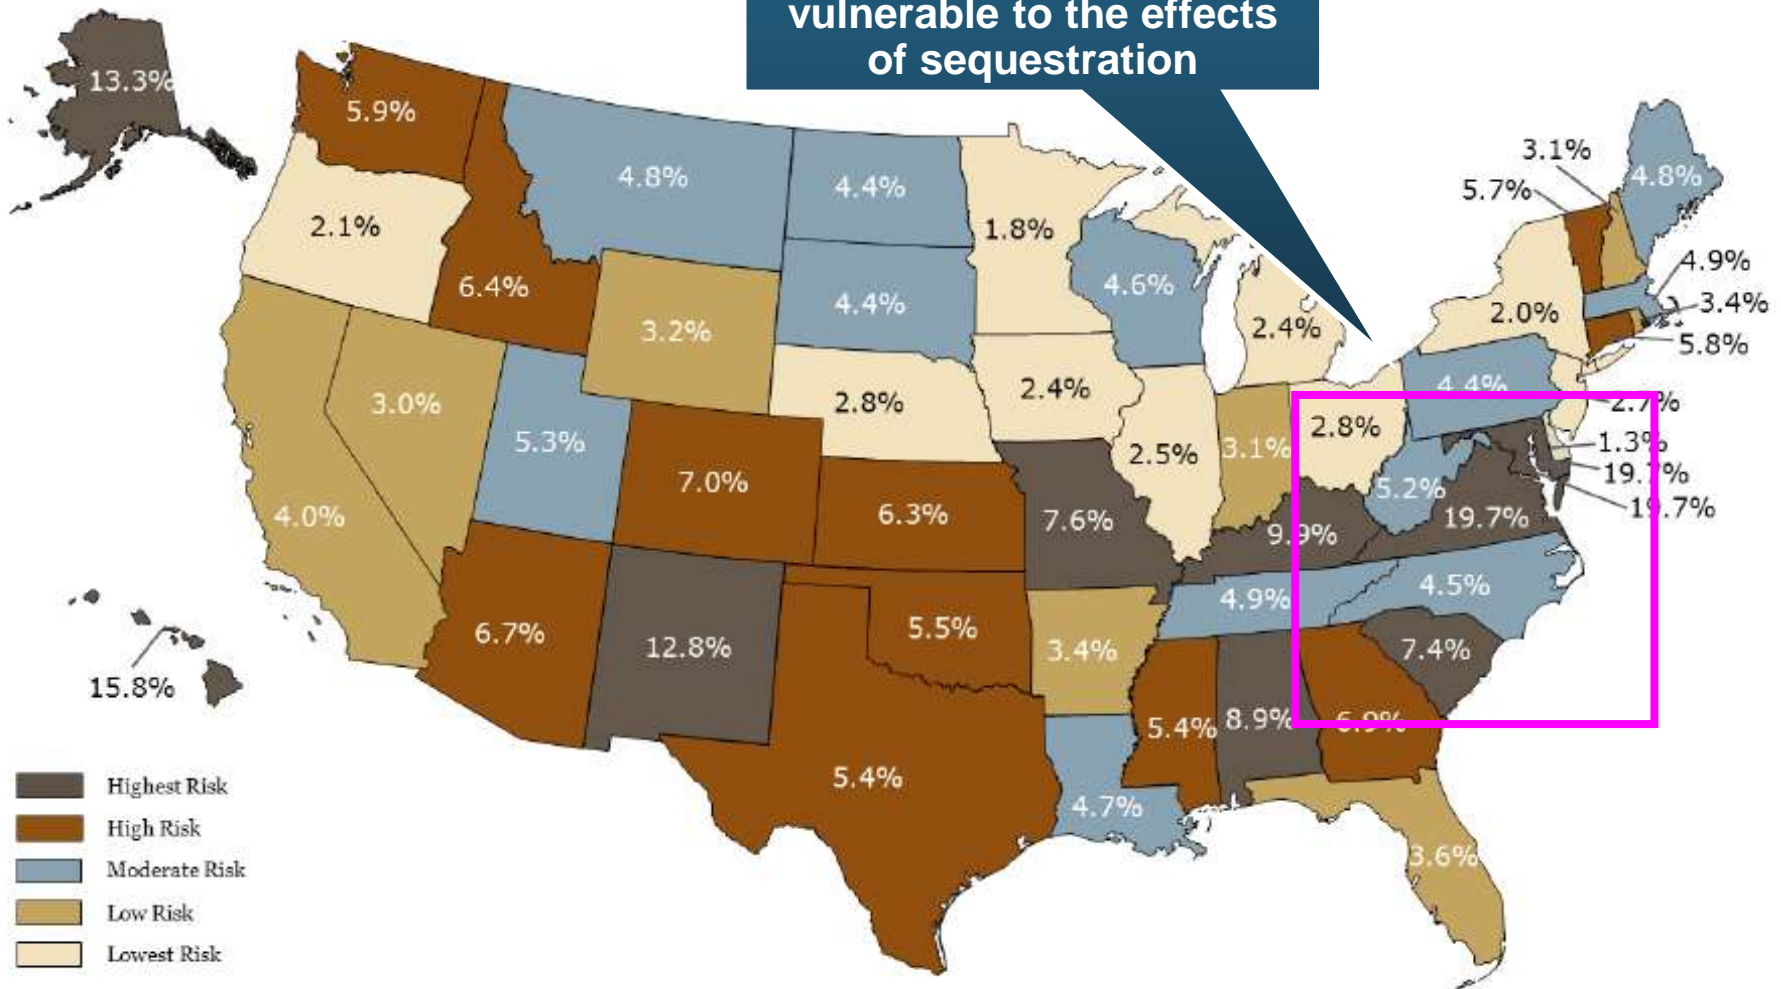

Sources: US Bureau of Labor Statistics; Insurance Information Institute.

Real GDP by State Percent Change, 2012: Lowest 25 States

Federal Spending as a Share of State GDP: Vulnerability to Sequestration Varies

Some Mid-Atlantic and Southern state are more vulnerable to the effects of sequestration

Defense and Non-Defense Federal Spending as a Share of State GDP: Top 10 States*

Defense Spending

Non-Defense Spending

Sequestration Could Adversely Impact Commercial Insurance Exposures Directly at Defense Contractors and Indirectly in Impacted Communities

*As of 2010.

Sources: Pew Center on the States (2012) *Impact of the Fiscal Cliff on the States*; Wells Fargo Securities; Insurance Information Institute.

State-by-State Leading Indicators through 2013:Q2

January 2013 State Leading Indexes: 6-Month Forecast

The economic outlook for most of New England is relatively strong, suggesting future strength in the creation of insurable exposures

Source: Federal Reserve Bank of Philadelphia

Consumer Sentiment Survey (1966 = 100)

January 2010 through July 2013

Optimism among consumers has remained fairly strong despite tax hikes, federal budget concerns. July's reading was the highest since July 2007

Consumer confidence has been low for years amid high unemployment, falling home prices and other factors adversely impact consumers, but improved substantially over the past two years

Auto/Light Truck Sales, 1999-2019F

(Millions of Units)

Car/Light Truck Sales Will Continue to Recover from the 2009 Low Point, Bolstering the Auto Insurer Growth and the Manufacturing Sector Along With Workers Comp Exposures

Personal Auto Insurance Direct Written Premiums vs. Recently-Registered Cars

**PP DWP, flat from 2004-2009, is rising again.
Conning forecasts growth at 3.5% in 2013 and 4.0% in 2014.**

Monthly Change* in Auto Insurance Prices, 1991–2013*

*Percentage change from same month in prior year; through June 2013; seasonally adjusted

Note: Recessions indicated by gray shaded columns.

Sources: US Bureau of Labor Statistics; National Bureau of Economic Research (recession dates); Insurance Information Institutes.

Monthly Change* in Auto Insurance Prices, January 2005 - June 2013

(Percent Change from same month, prior year)

Auto Insurance Price Increases Averaged 5.1% in 2010 over 2009, After Averaging 4.5% in 2009 over 2008.

Pricing weakened materially in 2011 and early 2012 but has strengthened since then

PPA Auto, like most p/c lines, exhibits strong cyclical in pricing. Prices rose from 2000 to late 2005, were flat/falling in 2006 and 2007 before beginning to rise gain in 2008.

Underwriting performance remained strong even when prices were flat or falling due to improvements in underlying frequency and severity trends

*Percentage change from same month in prior year, seasonally adjusted.
Sources: US Bureau of Labor Statistics; Insurance Information Institute

New Private Housing Starts, 1990-2019F

Insurers Are Starting to See Meaningful Exposure Growth for the First Time Since 2005 Associated with Home Construction: Construction Risk Exposure, Surety, Commercial Auto; Potent Driver of Workers Comp Exposure

Average Premium for Home Insurance Policies**

Countrywide Home Insurance Expenditures Increased by an Estimated 4.0% in 2011-2013

* Insurance Information Institute Estimates/Forecasts **Excludes state-run insurers.

Source: NAIC, Insurance Information Institute estimates for 2011-2013 based on CPI data and other data.

Construction Employment, Jan. 2010—July 2013*

(Thousands)

Construction employment growth accelerated in the second half of 2012 but flattened out by mid-2013. Construction is a key driver of workers comp exposure growth.

*Seasonally adjusted

Sources: US Bureau of Labor Statistics at <http://data.bls.gov>; Insurance Information Institute.

Construction Employment, Jan. 2003–July 2013

(Thousands)

The Construction Sector Could Be a Growth Leader in 2013 and 2014 as the Housing Market and Private Investment Recover. WC Insurers Will Benefit.

Note: Recession indicated by gray shaded column.

Sources: U.S. Bureau of Labor Statistics; Insurance Information Institute.

Nonfarm Payroll (Wages and Salaries): Quarterly, 2005–2013:Q2

Billions

Note: Recession indicated by gray shaded column. Data are seasonally adjusted annual rates.

Commercial & Industrial Loans Outstanding at FDIC-Insured Banks, Quarterly, 2006-2013*

Outstanding loan volume has been growing for over two years and (as of year-end 2012) surpassed previous peak levels.

*Latest data as of 6/14/2013.

Source: FDIC at <http://www2.fdic.gov/qbp/> (Loan Performance spreadsheet); Insurance Information Institute.

Percent of Non-current Commercial & Industrial Loans Outstanding at FDIC-Insured Banks, Quarterly, 2006:Q1, 2006-2012:Q4*

Non-current loans (those past due 90 days or more or in nonaccrual status) are back to early-recession levels, fueling bank willingness to lend.

*Latest data as of 3/18/2013.

Source: FDIC at <http://www2.fdic.gov/qbp/> (Loan Performance spreadsheet); Insurance Information Institute.

Value of Construction Put in Place, June 2013 vs. June 2012*

Growth (%)

Overall Construction Activity is Up, But Growth Is Entirely in the Private Sector as State/Local Government Budget Woes Continue

*seasonally adjusted

Source: U.S. Census Bureau, <http://www.census.gov/construction/c30/c30index.html> ; Insurance Information Institute.

Value of Private Construction Put in Place, by Segment, June 2013 vs. June 2012*

Growth (%)

Led by the Residential Construction, Lodging and Office segments, Private sector construction activity remains mixed after plunging during the “Great Recession.” Most segments expanded in 2012 but weakened in early 2013.

Private Construction Activity is Up in Some Segments, Including the Key Residential Construction Sector, But Weakened in the First Half of 2013

*seasonally adjusted

Source: U.S. Census Bureau, <http://www.census.gov/construction/c30/c30index.html> ; Insurance Information Institute.

Value of Public Construction Put in Place, by Segment, June 2013 vs. June 2012*

Growth (%)

Public sector construction activity is down substantially in most segments, a situation that will likely persist, dragging on public entity risk exposures

Transportation and Power projects lead public sector construction

Public Construction Activity is Down in Many Segments as State and Local Budgets Remain Under Stress; Improvement Possible in 2014.

*seasonally adjusted

Source: U.S. Census Bureau, <http://www.census.gov/construction/c30/c30index.html> ; Insurance Information Institute.

ISM Manufacturing Index

(Values > 50 Indicate Expansion)

January 2010 through July 2013

The manufacturing sector expanded for 39 of the 43 months from Jan. 2010 through June 2013. Recent weakness stems largely from woes in Europe and a Slowdown in China.

Dollar Value* of Manufacturers' Shipments Monthly, Jan. 1992—Apr. 2013

*seasonally adjusted

Source: U.S. Census Bureau, *Full Report on Manufacturers' Shipments, Inventories, and Orders*, <http://www.census.gov/manufacturing/m3/>

Manufacturing Growth for Selected Sectors, 2013 vs. 2013*

Growth (%)

Manufacturing Is Expanding—Albeit More Slowly—Across a Number of Sectors that Will Contribute to Growth in Insurable Exposures Including: WC, Commercial Property, Commercial Auto and Many Liability Coverages

*Seasonally adjusted; Date are YTD comparing data through May 2013 to the same period in 2012.

Source: U.S. Census Bureau, *Full Report on Manufacturers' Shipments, Inventories, and Orders*, <http://www.census.gov/manufacturing/m3/>

Recovery in Capacity Utilization is a Positive Sign for Commercial Exposures

March 2001 through June 2013

Percent of Industrial Capacity

Source: Federal Reserve Board statistical releases at <http://www.federalreserve.gov/releases/q17/Current/default.htm>.

Manufacturing Employment, Jan. 2010—July 2013*

(Thousands)

Manufacturing employment is up by more than 500,000 or 4.5% since Jan. 2010—a surprising source of strength in the economy. The sector has weakened recently as US corporations remains cautious and Europe, China slow.

*Seasonally adjusted

Sources: US Bureau of Labor Statistics at <http://data.bls.gov>; Insurance Information Institute.

ISM Non-Manufacturing Index (Values > 50 Indicate Expansion)

January 2010 through June 2013

Non-manufacturing industries have been expanding and adding jobs. The question is whether this will continue.

Business Bankruptcy Filings, 1980-2012:Q3

Significant Exposure Implications for All Commercial Lines as Business Bankruptcies Begin to Decline

Private Sector Business Starts, 1993:Q2 – 2012:Q3*

(Thousands)

**Business Starts Were Down Nearly 20% in the Recession,
Holding Back Most Types of Commercial Insurance Exposure, But
Are Recovering Slowly**

* Data through Sep. 30, 2012 are the latest available as of June 21, 2013; Seasonally adjusted.

12 Industries for the Next 10 Years: Insurance Solutions Needed

Health Care
Health Sciences
Energy (Traditional)
Alternative Energy
Petrochemical
Agriculture
Natural Resources
Technology (incl. Biotechnology)
Light Manufacturing
Insourced Manufacturing
Export-Oriented Industries
Shipping (Rail, Marine, Trucking, Pipelines)

Many industries are poised for growth, though insurers' ability to capitalize on these industries varies widely

U.S. Insured Catastrophe Loss Update

**Catastrophe Losses in Recent Years
Have Been Very High**

U.S. Insured Catastrophe Losses

(\$ Billions, 2012 Dollars)

2012 Was the 3rd Highest Year on Record for Insured Losses in U.S. History on an Inflation-Adj. Basis. 2011 Losses Were the 6th Highest. YTD 2013 Running Below Average But Q3 Is Typically the Costliest Quarter.

Record tornado losses caused 2011 CAT losses to surge

*Through 6/2/13. Includes \$2.6B for 2013:Q1 (PCS) and \$5.32B for the period 4/1 – 6/2/13 (Aon Benfield Monthly Global Catastrophe Recap).

Note: 2001 figure includes \$20.3B for 9/11 losses reported through 12/31/01 (\$25.9B 2011 dollars). Includes only business and personal property claims, business interruption and auto claims. Non-prop/BI losses = \$12.2B (\$15.6B in 2011 dollars.)

Sources: Property Claims Service/ISO; Insurance Information Institute.

Moore, OK, Tornado: Media Coverage Was Generally Favorable

- Industry had a highly visible, rapid response as Catastrophe Response Teams massed at the “Command Center” at the First Baptist Church in Moore within 48 hours
- Developed good working relationship with OK Insurance Commissioner John Doak

Number

Convective Loss Events in the U.S.

Overall and insured losses 1980 – 2012 and First Half 2013

(Bill. US\$)

New Research Suggests Increase in Convective Activity Is Costly for Insurers

- Study examines convective (hail, tornado, thundersquall and heavy rainfall) events in the US with losses exceeding US\$ 250m in the period 1970–2009 (80% of all losses)
- Past losses are normalized (i.e., adjusted) to currently exposed values
- After normalization there are still increases of losses
- Increases are correlated with the increase in the meteorological potential for severe thunderstorms and its variability

For the first time research shows that climatic changes have already influenced US thunderstorm losses

Terrorism Update

**Boston Marathon Bombings Underscore
the Need for Extension of the Terrorism
Risk Insurance Program**

***Download III's Terrorism Insurance Report at:
[http://www.iii.org/white_papers/terrorism-
risk-a-constant-threat-2013.html](http://www.iii.org/white_papers/terrorism-risk-a-constant-threat-2013.html)***

Terrorism Risk Insurance Program

- Reauthorization Was a Major Industry Initiative for 2013 Even Before Boston
- I.I.I. Testified at First Congressional Hearing on 9/11/12
 - ◆ Provided testimony at NYC hearing on 6/17/13
- I.I.I. Accelerated Planned Study on Terrorism Risk and Insurance in the Wake of Boston and Was Well Received
 - ◆ *Terrorism: A Constant Threat* issued in June 2013

Terrorism Risk Insurance Program

■ Boston Marathon Bombing Has Helped Focus Attention in Congress on TRIPRA and its Looming Expiration

- ◆ Act expires 12/31/14
- ◆ Exclusionary language will likely be inserted for post-1/1/2014 renewals and will likely lead to significant media interest (educational opportunity)
- ◆ Numerous headwinds; not a priority issue in 2013 in Congress
- ◆ 3 extension bills introduced in 2013—2 since Boston

■ Media Interest Soared

- ◆ I.I.I. was conducting its first interviews within minutes after live-tweeting (nearly) from the scene; TV interest was high
- ◆ Local, national and international media focused on this topic for the first time in any significant way since TRIA's inception in late 2002
- ◆ Inquiries revealed very little/no understanding (or even awareness) outside insurance industry and business owners
- ◆ Certification process caused confusion

Summary of Terrorism Risk Insurance Program Extension Bills Introduced in 2013

Bill	Summary
<ul style="list-style-type: none"> • H.R. 508: “Terrorism Risk Insurance Act of 2002 Reauthorization Act of 2013” • Introduced Feb. 5 by Rep. Michael Grimm (D-NY) 	<ul style="list-style-type: none"> • 5-Year Extension (through 2019) • Extend recoupment period for any TRIA assistance from 2017 to 2019
<ul style="list-style-type: none"> • H.R. 2146: “Terrorism Risk Insurance Program Reauthorization Act of 2013” • Introduced May 23 by Rep. Michael Capuano (D-MA) 	<ul style="list-style-type: none"> • 10-Year Extension (through 2024) • Extend recoupment period for any TRIA assistance from 2017 to 2024 • Requires President’s Working Group on Financial Markets (PWGFM) to issue reports on long-term availability and affordability of terrorism insurance in 2017, 2020 and 2023 • Reports to be drafted with consultation from NAIC and representatives of the insurance and securities industries and policyholders
<ul style="list-style-type: none"> • H.R. 1945: “Fostering Resilience to Terrorism Act of 2013” • Introduced May 9 by Rep. Benny Thompson (D-MS) 	<ul style="list-style-type: none"> • 10-Year Extension (through 2024) • Recoupment period changed to 2024 • Would transfer responsibility for certification of a “act of terrorism” to the Secretary of Homeland Security from Secretary of Treasury. • PWGFM to issue reports in 2017, 2020 and 2023 • Requires Sec. of DHS to provide insureds with “timely homeland security information, including terrorism risk information, at the appropriate level of classification and information on best practices to foster resilience to an act of terrorism.”

Terrorism Violates Traditional Requirements for Insurability

Requirement	Definition	Violation
Estimable Frequency	<ul style="list-style-type: none">•Insurance requires large number of observations to develop predictive rate-making models (an actuarial concept known as credibility)	<ul style="list-style-type: none">•Very few data points•Terror modeling still in infancy, untested.•Inconsistent assessment of threat
Estimable Severity	<ul style="list-style-type: none">•Maximum possible/ probable loss must be at least estimable in order to minimize “risk of ruin” (insurer cannot run an unreasonable risk of insolvency though assumption of the risk)	<ul style="list-style-type: none">•Potential loss is virtually unbounded.•Losses can easily exceed insurer capital resources for paying claims.•Extreme risk in workers compensation and statute forbids exclusions.

Terrorism Violates Traditional Requirements for Insurability (cont'd)

Requirement	Definition	Violation
Diversifiable Risk	<ul style="list-style-type: none">•Must be able to spread/distribute risk across large number of risks•“Law of Large Numbers” helps makes losses manageable and less volatile	<ul style="list-style-type: none">•Losses likely highly concentrated geographically or by industry (e.g., WTC, power plants)
Random Loss Distribution/ Fortuity	<ul style="list-style-type: none">•Probability of loss occurring must be purely random and fortuitous•Events are individually unpredictable in terms of time, location and magnitude	<ul style="list-style-type: none">•Terrorism attacks are planned, coordinated and deliberate acts of destruction•Dynamic target shifting from “hardened targets” to “soft targets”•Terrorist adjust tactics to circumvent new security measures•Actions of US and foreign govts. may affect likelihood, nature and timing of attack

Public Opinion Survey

Industry Favorability Ratings
Policy Forms & Disclosure
Disaster Preparedness

I.I.I. Poll: Favorability

Percent of Public Rating Industry as Very or Mostly Favorable, 2013

Auto Insurers and Home Insurers Ranked Highest.

I.I.I. Poll: Homeowners Insurance

Q. Do you think that it is fair that people who live in areas affected by record storms in 2011 and 2012 should pay more for their homeowners insurance in the future?

Public believes it is not fair to raise premiums of homeowners due to events they cannot control

Nearly 60 percent of Americans believe that homeowners insurance premiums should not be raised as a result of recent storms in their areas.

I.I.I. Poll: Flood Insurance

Q. The federal government plans to raise the price of flood insurance so it reflects the costs of paying claims. Do you believe this is fair?

[% Responding "NO"]

More than one-half of Americans do not think it is fair for the federal government to raise its flood insurance premiums to better reflect claims payouts.

I.I.I. Poll: Disaster Preparedness

Q. Does your homeowners policy cover damage from flooding during a hurricane?¹

The proportion of homeowners who believe their homeowners policy covers damage from flooding during a hurricane stands at 21 percent. This proportion rises eight percentage points in the South, to 29 percent.

¹Asked of those who have homeowners insurance and who responded "yes".

I.I.I. Poll: Disaster Preparedness

Q. Have recent flooding events such as Hurricane Sandy or Hurricane Irene motivated you to buy flood coverage?¹

Recent storms have not motivated people to buy flood insurance coverage

¹Asked of those who have homeowners insurance but not flood insurance.

I.I.I. Poll: Disaster Preparedness

Q. If you expect some relief from the government, do you purchase less insurance coverage against these natural disasters than you would have otherwise?

Seventy-two percent of Americans would not purchase less insurance if they expect some relief from the government—but 22% would.

The BIG Question: Where Is the Market Heading?

**Catastrophes and Other Factors Are
Pressuring Insurance Markets**

***New Factor: Record Low Interest
Rates Are Contributing to
Underwriting and Pricing Pressures***

INVESTMENTS: THE NEW REALITY

**Investment Performance is a Key
Driver of Profitability**

***Depressed Yields Will Necessarily
Influence Underwriting & Pricing***

Property/Casualty Insurance Industry Investment Income: 2000–2013*¹

(\$ Billions)

Investment Income Fell in 2012 and is Falling in 2013 Due to Persistently Low Interest Rates, Putting Additional Pressure on (Re) Insurance Pricing

¹ Investment gains consist primarily of interest and stock dividends..

*Estimate based on annualized actual Q1:2013 investment income of \$11.385B.

Sources: ISO; Insurance Information Institute.

P/C Insurer Net Realized Capital Gains/Losses, 1990-2013:Q1

(\$ Billions)

Insurers Posted Net Realized Capital Gains in 2010, 2011 and 2012 Following Two Years of Realized Losses During the Financial Crisis. Realized Capital Losses Were the Primary Cause of 2008/2009's Large Drop in Profits and ROE

Property/Casualty Insurance Industry Investment Gain: 1994–2013:Q1¹

(\$ Billions)

Investment Gains Are Slipping in 2012 as Low Interest Rates Reduce Investment Income and Lower Realized Investment Gains; The Financial Crisis Caused Investment Gains to Fall by 50% in 2008

¹ Investment gains consist primarily of interest, stock dividends and realized capital gains and losses.

* 2005 figure includes special one-time dividend of \$3.2B;

Sources: ISO; Insurance Information Institute.

P/C Industry Investment Gains, Inflation-Adjusted: 1994–2012¹

(\$ Billions,
2012 dollars)

Because the Federal Reserve Board aims to keep interest rates exceptionally low until the unemployment rate hits 6.5%—likely at least another year off—maturing bonds will be re-invested at even lower rates.

¹Investment gains consist primarily of interest, stock dividends and realized capital gains and losses.

*2005 figure includes special one-time dividend of \$3.2B; 2013F figure is I.I.I. estimate for 2013:Q1, annualized.

Sources: ISO; Insurance Information Institute.

U.S. 10-Year Treasury Note Yields: A Long Downward Trend, 1990–2013*

Since roughly 80% of P/C bond/cash investments are in 10-year or shorter durations, most P/C insurer portfolios will have low-yielding bonds for years to come.

*Monthly, through June 2013.

Note: Recessions indicated by gray shaded columns.

Sources: Federal Reserve Bank at <http://www.federalreserve.gov/releases/h15/data.htm>.

National Bureau of Economic Research (recession dates); Insurance Information Institutes.

U.S. Treasury Security Yields: A Long Downward Trend, 1990–2013*

Since roughly 80% of P/C bond/cash investments are in 10-year or shorter durations, most P/C insurer portfolios will have low-yielding bonds for years to come.

*Monthly, constant maturity, nominal rates, through June 2013.

Sources: Federal Reserve Bank at <http://www.federalreserve.gov/releases/h15/data.htm>.
National Bureau of Economic Research (recession dates); Insurance Information Institute.

Treasury Yield Curves: Pre-Crisis (July 2007) vs. June 2013

The Fed Is Actively Signaling that it Is Determined to Keep Rates Low Until Unemployment Drops Below 6.5% or Until Inflation Expectations Exceed 2.5%; Low Rates Add to Pricing Pressure for Insurers.

Average Maturity of Bonds Held by US P/C Insurers, 2006—2011*

Average Maturity (Years)

Falling Average Maturity (and Duration) of the P/C Industry's Bond Portfolio is Contributing to the Drop in Investment Income Along With Lower Yields

*Year-end figures. Latest available.

Sources: Insurance Information Institute calculations based on A.M. Best data.

Distribution of Bond Maturities, P/C Insurance Industry, 2003-2012

The main shift over these years has been from bonds with longer maturities to bonds with shorter maturities. The industry first trimmed its holdings of over-10-year bonds (from 24.6% in 2003 to 15.5% in 2012) and then trimmed bonds in the 5-10-year category (from 31.3% in 2003 to 27.6% in 2012). Falling average maturity of the P/C industry's bond portfolio is contributing to a drop in investment income along with lower yields.

Bonds Rated NAIC Quality Category 3-6 as a Percent of Total Bonds, 2003–2012

There are many ways to capture higher yields on bond portfolios. One is to accept greater risk, as measured by NAIC bond ratings. The ratings range from 1 to 6, with the highest quality rated 1. Even in 2012, over 95% of the industry's bonds were rated 1 or 2.

Insurance Industry Fair Value as a Percent of Par History, by Bond Type, 2002–2012

Because the Federal Reserve Board aims to keep interest rates exceptionally low until the “headline” unemployment rate hits 6.5%, maturing bonds will be re-invested at even lower rates.

As Yields (Blue) Sank, Fair Value as a Percent of Par (Orange) Rose, 2002–2012

When interest rates rise again, the Fair Value of Insurance Industry bonds will fall. How far and how fast the fall occurs depends on many factors, but the direction of change is clear.

Reduction in Combined Ratio Necessary to Offset 1% Decline in Investment Yield to Maintain Constant ROE, by Line*

Lower Investment Earnings Place a Greater Burden on Underwriting and Pricing Discipline

*Based on 2008 Invested Assets and Earned Premiums

**US domestic reinsurance only

Source: A.M. Best; Insurance Information Institute.

Annual Inflation Rates, (CPI-U, %), 1990–2014F

Annual Inflation Rates (%)

The slack in the U.S. economy suggests that inflationary pressures should remain subdued for an extended period of times. Energy, health care and commodity prices, plus U.S. debt burden, remain longer-run concerns

1. UNDERWRITING

**Underwriting Losses in 2011
and 2012 Are Elevated by High
Catastrophe Losses**

P/C Insurance Industry Combined Ratio, 2001–2013:Q1*
