Presentation Outline

- **U.S. Economic Overview and Outlook**
 - ◆ Economy as a Growth Engine for P/C Insurers
 - ◆ Labor Market Review
- **Summary of P/C Financial Performance**
- **Catastrophe Loss Developments & Trends**
 - ◆ US, Global
- **A History of Claim Activity in the US**
- **Will the Market Turn? Four Necessary Criteria:**
 - ◆ Underwriting Loss Trends
 - ◆ Capital/Capacity
 - ◆ Reinsurance Markets
 - ◆ Pricing Discipline
- **Analysis by Key Line**
- **Other Contributing Factors to the Underwriting Cycle**
 - ◆ Investment Environment
 - ◆ Tort/Casualty Environment
 - ◆ Inflation
- **Q&A**

Economics 2012: The World Is Changing

**2012 Is the First Year Since 2005
Where Economic Perceptions and
Reality in the US Will Be Positive**
***Potentially Enormous Benefits for
P/C Insurers***

- **Economic Growth Will Accelerate Modestly in 2012/13, Beating Expectations**
 - ◆ No Double Dip Recession
 - ◆ Economy is more resilient than most pundits presume
- **Consumer Confidence Will Continue to Improve**
- **Consumer Spending/Investment Will Continue to Expand**
- **Consumer and Business Lending Continue to Expand**
- **Housing Market Remains Weak, but Some Improvement Expected in 2012**
- **Inflation Remains Tame**
 - ◆ Runaway inflation highly unlikely but energy spike possible; Fed has things under control
 - ◆ Deflation—threat has virtually disappeared
- **Private Sector Hiring Remains Consistently Positive, Exceeds Expectations**
 - ◆ Unemployment dips below 8% by year's end
- **Sovereign Debt, Euro Currency/Economy, Muni Bond “Crises” Overblown**
- **Current Middle East Turmoil Poses Somewhat Greater Risk to US Economy**
- **Interest Rates Remain Low by Historical Standards; Edge Up by Year's End**
- **Stock and Bond Markets More Stable, Less Volatile**
- **Political Environment Is More Hospitable to Business Interests**
- **Obama Wins Re-Election Based on Improving Economy; Foreign Policy**

■ P/C Insurance Exposures Grow Robustly

- ◆ Personal and commercial exposure growth is certain in 2012; Strongest since 2004
- ◆ But restoration of destroyed exposure will take until mid-decade

■ P/C Industry Growth in 2012 Will Be Strongest Since 2003

- ◆ Growth likely to exceed A.M. Best projection of +3.8% for 2012
- ◆ No traditional “hard market” emerges in 2012

■ Underwriting Fundamentals Deteriorate Modestly

- ◆ Some pressure from claim frequency, in some severity in key lines

■ Increasing Private Sector Hiring Will Drive Payrolls/WC Exposures

- ◆ Wage growth is also positive and could modestly accelerate
- ◆ WC will prove to be tough to fix from an underwriting perspective

■ Increase in Demand for Commercial Insurance Will Accelerate in 2012

- ◆ Includes workers comp, property, marine, many liability coverages
- ◆ Laggards: inland marine, aviation, commercial auto, surety
- ◆ Personal Lines: Auto leads, homeowners lags (*though HO leads in NPW growth due to rates*)

■ Investment Environment Is/Remains Much More Favorable

- ◆ Return of realized capital gains as a profit driver
- ◆ Interest rates remain low; Some upward pressured if economic strength surprises

■ Industry Capacity Hits a New Record by Year-End 2012 (Barring Mega-CAT)

The Strength of the Economy Will Influence P/C Insurer Growth Opportunities

**Growth Will Expand Insurable Exposures
and Help Absorb Excess Capital**

US Real GDP Growth*

Demand for Insurance Continues To Be Impacted by Sluggish Economic Conditions, but the Benefits of Even Slow Growth Will Compound and Gradually Benefit the Economy Broadly

Consumer Sentiment Survey (1966 = 100)

January 2010 through January 2012

Consumer confidence has been low for years amid high unemployment, falling home prices and other factors adversely impact consumers, but improved substantially in late 2011 and early 2012

Auto/Light Truck Sales, 1999-2022F

(Millions of Units)

Car/Light Truck Sales Will Continue to Recover from the 2009 Low Point, Bolstering the Auto Insurer Growth and the Manufacturing Sector.

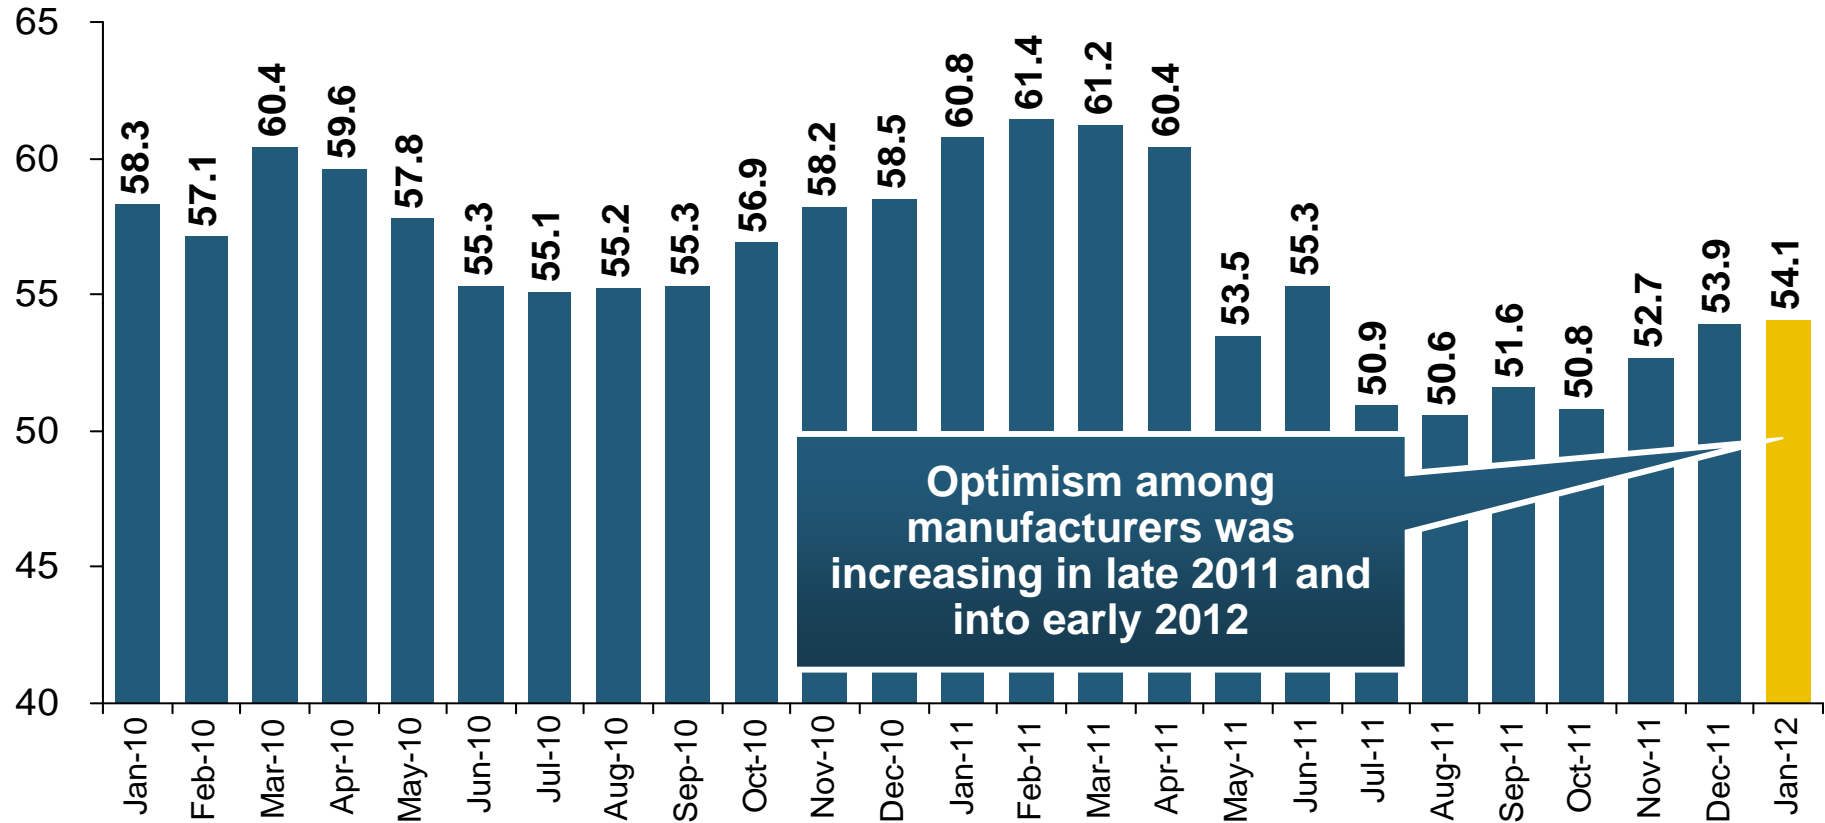

New Private Housing Starts, 1990-2022F

Little Exposure Growth Likely for Homeowners Insurers Until at least 2014. Also Affects Commercial Insurers with Construction Risk Exposure, Surety

ISM Manufacturing Index (Values > 50 Indicate Expansion)

January 2010 through January 2012

**The manufacturing sector has been expanding and adding jobs.
The question is whether this will continue.**

Dollar Value* of Manufacturers' Shipments Monthly, Jan. 1992—Dec. 2011

\$ Millions

Monthly shipments are nearly back to peak (in July 2008, 8 months into the recession). Trough in May 2009. Growth from trough to December 2011 was 29.0%. This growth leads to gains in many commercial exposures: WC, Commercial Auto, Property and Various Liability Coverages

Recovery in Capacity Utilization is a Positive Sign for Commercial Exposures

Percent of
Industrial Capacity

ISM Non-Manufacturing Index (Values > 50 Indicate Expansion)

January 2010 through January 2012

Non-manufacturing industries have been expanding and adding jobs. The question is whether this will continue.

11 Industries for the Next 10 Years: Insurance Solutions Needed

Health Care
Health Sciences
Energy (Traditional)
Alternative Energy
Agriculture
Natural Resources
Environmental
Technology (incl. Biotechnology)
Light Manufacturing
Export-Oriented Industries
Shipping (Rail, Marine, Trucking)

Many industries are poised for growth, but many insurers do not write in these economic segments

Labor Market Trends

**Massive Job Losses Sapped the
Economy and Commercial/Personal
Lines Exposure, But Trend is
Improving**

Unemployment and Underemployment Rates: Stubbornly High in 2011, But Falling

January 2000 through January 2012, Seasonally Adjusted (%)

U-6 went from 8.0% in March 2007 to 17.5% in October 2009; Stood at 15.1% in Jan. 2012

Unemployment stood at 8.3% in January 2012

Unemployment peaked at 10.1% in October 2009, highest monthly rate since 1983.

Peak rate in the last 30 years: 10.8% in November - December 1982

Stubbornly high unemployment and underemployment constrain overall economic growth, but the job market is now clearly improving

Monthly Change in Private Employment

January 2008 through January 2012* (Thousands)

Private Employers Added 3.771 million Jobs Since Jan. 2010 After Having Shed 4.66 Million Jobs in 2009 and 3.81 Million in 2008 (State and Local Governments Have Shed Hundreds of Thousands of Jobs)

Global Catastrophe Loss Developments and Trends

**2011 Rewrote Catastrophe Loss and
Insurance History**

But Will Losses Turn the Market?

Global Catastrophe Loss Summary: 2011

■ 2011 Was the *Highest* Loss Year on Record for Economic Losses Globally

- ◆ Extraordinary accumulation of severe natural catastrophe: Earthquakes, tsunami, floods and tornadoes are the primary causes of loss

■ \$380 Billion in *Economic* Losses Globally (New Record)

- ◆ New record, exceeding the previous record of \$270B in 2005

■ \$105 Billion in *Insured* Losses Globally

- ◆ 2011 losses were 2.5 times 2010 insured losses of \$42B
- ◆ Second only to 2005 on an inflation adjusted basis (new record on a unadjusted basis)
- ◆ Over 5 times the 30-year average of \$19B

■ \$72.8 Billion in *Economic* Losses in the US

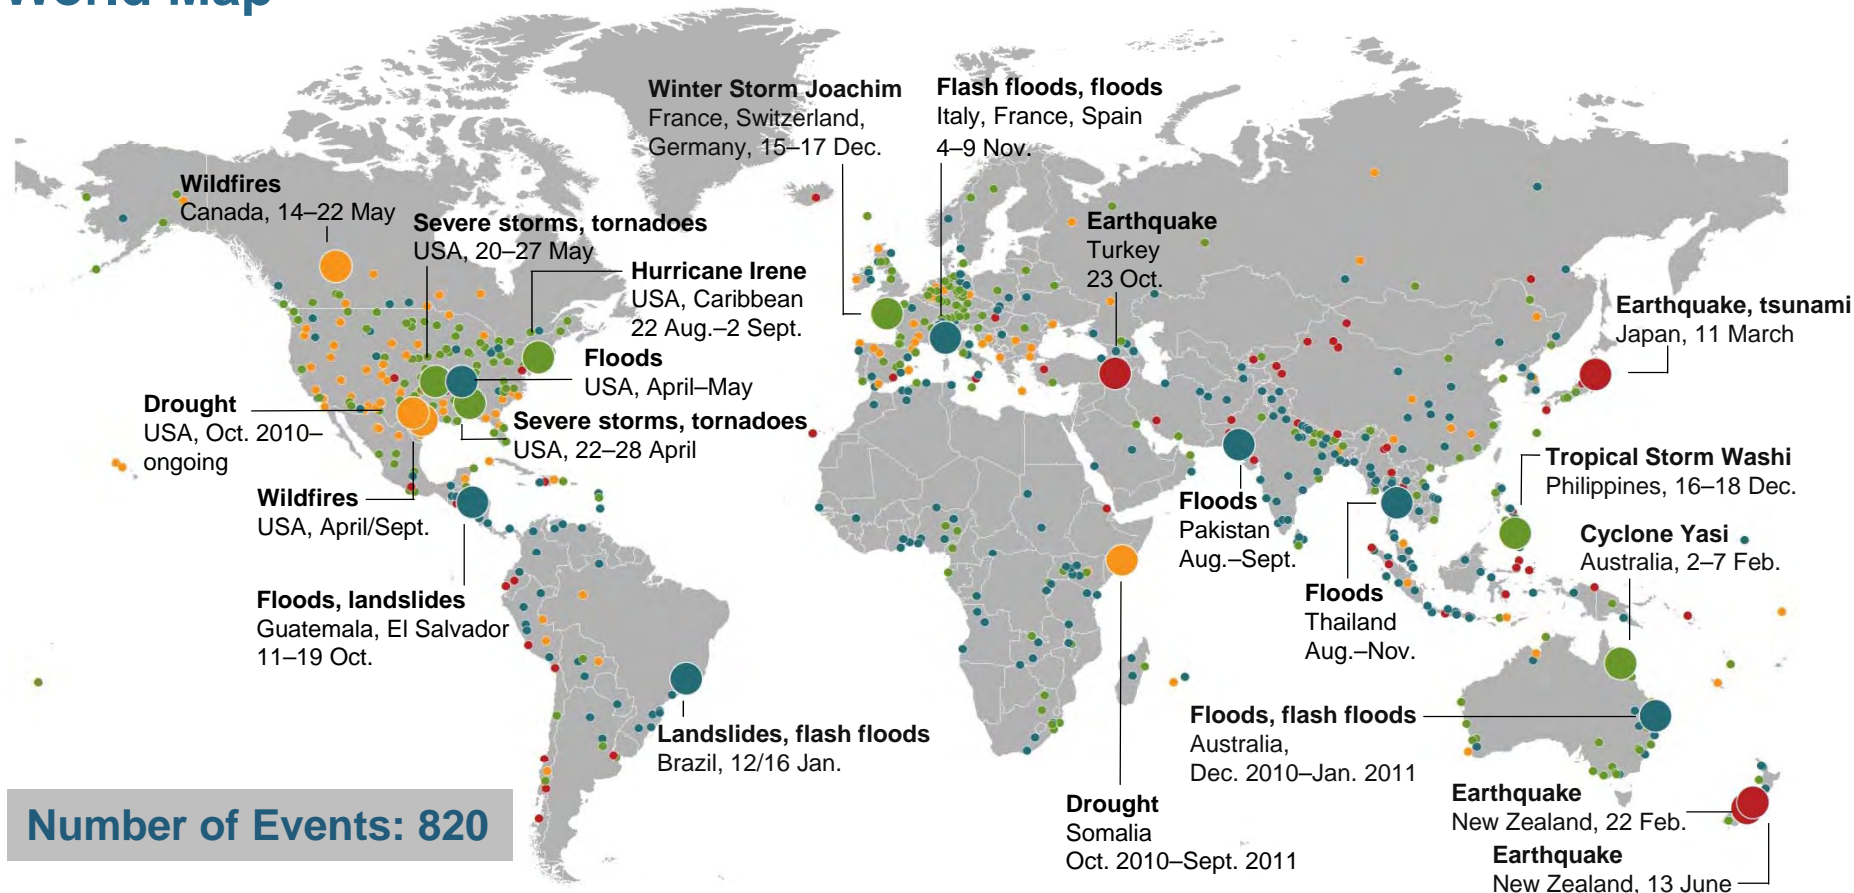

- ◆ Represents a 129% increase over the \$11.8 billion amount through the first half of 2010

■ \$35.9 Billion in *Insured* Losses in the US Arising from 171 CAT Events

- ◆ Fifth highest year on record
- ◆ Represents 51% increase over the \$23.8 billion total in 2010

The BIG Question: When Will the Market Turn?

Are Catastrophes and Other Factors Pressuring Insurance Markets?

Criteria Necessary for a “Market Turn”: All Four Criteria Must Be Met

Criteria	Status	Comments
Sustained Period of Large Underwriting Losses	<i>Early Stage, Inevitable</i>	<ul style="list-style-type: none"> • Apart from 2011 CAT losses, overall p/c underwriting losses remain modest • Combined ratios (ex-CATs) still in low 100s (vs. 110+ at onset of last hard market) • Prior-year reserve releases continue to reduce u/w losses, boost ROEs, though more modestly
Material Decline in Surplus/ Capacity	<i>Entered 2011 At Record High; Since Fallen</i>	<ul style="list-style-type: none"> • Surplus hit a record \$565B as of 3/31/11 • Fell by 4.6% through 9/30/11 (latest available) • Little excess capacity remains in reinsurance markets • Weak growth in demand for insurance is insufficient to absorb much excess capacity
Tight Reinsurance Market	<i>Somewhat in Place</i>	<ul style="list-style-type: none"> • Much of the global “excess capacity” was eroded by cats • Higher prices in Asia/Pacific • Modestly higher pricing for US risks
Renewed Underwriting & Pricing Discipline	<i>Some Firming esp. in Property, WC</i>	<ul style="list-style-type: none"> • Commercial lines pricing trends have turned from negative to flat or up in some lines (property, WC); Casualty is flat. • Competition remains intense as many seek to maintain market share

Do the Property Catastrophe Events of 2011 Impact Casualty Markets?

- **Unlikely that Record 2011 Property CAT Loss Will Impact Casualty Markets in Any Material Way, Including Professional Liability Lines**
- **Global P/C & Reinsurance Industries Entered 2011 w/ Record Capital**
 - ◆ Events so far in 2011 are earnings events, rather than capital events
- **Natural Catastrophe and Casualty Risks Are Largely Uncorrelated**
 - ◆ Risks are different
 - ◆ Geographically, mostly distinct primary carriers: Japan-Australia-NZ-US
 - ◆ Casualty markets generally don't influence property markets
- **Property and Casualty Risks Are Largely Siloed**
- **Record Property Losses in 2004/2005 Did Not Impact Casualty Mkts.**
- **Casualty Markets Have Their Own Issues**
 - ◆ Tort environment
 - ◆ Inflation
 - ◆ Public policy

**Despite the Facts, an
