# **Insurance Industry:** ***Financial Update & Outlook***

***2014 Was a Reasonably Good Year***  
**2015: A Repeat of 2014?**

- **Flat to modest premium growth in 2015**
- **Rate environment suggests flat-to-slightly negative renewals in late 2014/early 2015, but results vary**
- **Economic strengthening, stronger jobs market are pluses and should drive new exposures**
- **Construction, manufacturing have been growth areas but cooled in late 2014/early 2015; Public entities are now growth sector for the first time since the Great Recession**
- **Loss costs driven by modest frequency and severity trends, but helped by reserve releases, low cats, low infl.**
- **Property cat reinsurance costs continue to fall**
- **Investment income still under pressure from low yields**

# P/C Industry Net Income After Taxes 1991–2014E

• ROE figures are GAAP; <sup>1</sup>Return on avg. surplus. Excluding Mortgage & Financial Guaranty insurers yields a 7.7% ROAS through 2014:Q2, 9.8% ROAS in 2013, 6.2% ROAS in 2012, 4.7% ROAS for 2011, 7.6% for 2010 and 7.4% for 2009.

Sources: A.M. Best, ISO; Insurance Information Institute

Note: Data include state funds beginning in 1998.  
Source: A.M. Best; Insurance Information Institute.

# P/C Insurance Industry Combined Ratio, 2001–2014:Q3\*

\* Excludes Mortgage & Financial Guaranty insurers 2008--2014. Including M&FG, 2008=105.1, 2009=100.7, 2010=102.4, 2011=108.1; 2012:=103.2; 2013:= 96.1; 2014:9M = 97.7.

Sources: A.M. Best, ISO.

# A 100 Combined Ratio Isn't What It Once Was: Investment Impact on ROEs

## Combined Ratio / ROE

**A combined ratio of about 100 generates an ROE of ~7.0% in 2012/13, ~7.5% ROE in 2009/10, 10% in 2005 and 16% in 1979**

**Lower CATs  
helped ROEs  
in 2013**

**Combined Ratios Must Be Lower in Today's Depressed Investment Environment to Generate Risk Appropriate ROEs**

\* 2008 -2014 figures are return on average surplus and exclude mortgage and financial guaranty insurers. 2014:9M combined ratio including M&FG insurers is 97.7; 2013 = 96.1; 2012 =103.2, 2011 = 108.1, ROAS = 3.5%.

# **INVESTMENTS: THE NEW REALITY**

**Investment Performance is a Key  
Driver of Profitability**

***Depressed Yields Will Necessarily  
Influence Underwriting & Pricing***

# Property/Casualty Insurance Industry Investment Income: 2000–2014<sup>1</sup>

(\$ Billions)

**Due to persistently low interest rates,  
investment income fell in 2012, 2013 and 2014.**

<sup>1</sup> Investment gains consist primarily of interest and stock dividends.  
Sources: ISO; Insurance Information Institute.

\*2014 figure is estimated based on annualized data through Q3.

# Distribution of Invested Assets: P/C Insurance Industry, 2013

**\$ Billions**

# U.S. Treasury Security Yields: A Long Downward Trend, 1990–2015\*

**Since roughly 80% of P/C bond/cash investments are in 10-year or shorter durations, most P/C insurer portfolios will have low-yielding bonds for years to come.**

\*Monthly, constant maturity, nominal rates, through Jan. 2015.

Sources: Federal Reserve Bank at <http://www.federalreserve.gov/releases/h15/data.htm>. National Bureau of Economic Research (recession dates); Insurance Information Institute.

# Book Yield on Property/Casualty Insurance Invested Assets, 2007–2016F

(Percent)

The yield on invested assets continues to decline as returns on maturing bonds generally still exceed new money yields. The end of the Fed's QE program in Oct. 2014 should allow some increase in longer maturities while short term interest rate increases are unlikely until mid-to-late 2015

# Interest Rate Forecasts: 2015 – 2020

Yield (%)

## 3-Month Treasury

## 10-Year Treasury

**A Full Normalization of Interest Rates Is Unlikely Until 2018, More than a Decade After the Onset of the Financial Crisis**

# Annual Inflation Rates, (CPI-U, %), 1990–2016F

## Annual Inflation Rates (%)

**Slack in the U.S. economy and falling energy prices suggests that inflationary pressures should remain subdued for an extended period of times**

# Reduction in Combined Ratio Necessary to Offset 1% Decline in Investment Yield to Maintain Constant ROE, by Line\*

**Lower Investment Earnings Place a Greater Burden on Underwriting and Pricing Discipline**

\*Based on 2008 Invested Assets and Earned Premiums

\*\*US domestic reinsurance only

Source: A.M. Best; Insurance Information Institute.

# P/C Insurer Net Realized Capital Gains/Losses, 1990-2014:Q3

**Insurers Posted Net Realized Capital Gains in 2010 - 2014 Following Two Years of Realized Losses During the Financial Crisis. Realized Capital Losses Were a Primary Cause of 2008/2009's Large Drop in Profits and ROE**

# Property/Casualty Insurance Industry Investment Gain: 1994–2014E<sup>1</sup>

(\$ Billions)

**Total Investment Gains Were Flat in 2014 as Low Interest Rates Pressured Investment Income but Realized Capital Gains Remained Robust**

<sup>1</sup> Investment gains consist primarily of interest, stock dividends and realized capital gains and losses.

\* 2005 figure includes special one-time dividend of \$3.2B;

Sources: ISO; Insurance Information Institute.

# S&P 500 Index Returns, 1950 – 2015\*

Annual Return

\*Through March 3, 2015.

# Distribution of Bond Maturities, P/C Insurance Industry, 2003-2013

The main shift over these years has been from bonds with longer maturities to bonds with shorter maturities. The industry first trimmed its holdings of over-10-year bonds (from 24.6% in 2003 to 15.5% in 2012) and then trimmed bonds in the 5-10-year category (from 31.3% in 2003 to 27.6% in 2012). Falling average maturity of the P/C industry's bond portfolio is contributing to a drop in investment income along with lower yields.

# **CAPITAL/CAPACITY**

**Capital Accumulation Has  
Multiple Impacts**

# Policyholder Surplus, 2006:Q4–2014:Q3

(\$ Billions)

**The industry now has \$1 of surplus for every \$0.73 of NPW, close to the strongest claims-paying status in its history.**

2010:Q1 data includes \$22.5B of paid-in capital from a holding company parent for one insurer's investment in a non-insurance business.

**The P/C insurance industry entered 2015 in very strong financial condition.**

# US Policyholder Surplus: 1975–2014\*

(\$ Billions)

**The Premium-to-Surplus Ratio Stood at \$0.73:\$1 as of 9/30/14, a Near Record Low (at Least in Recent History)**

\* As of 9/30/14.

Source: A.M. Best, ISO, Insurance Information Institute.

# Premium-to-Surplus Ratio: 1985–2014\*

(Ratio of NWP to PHS)

**The Premium-to-Surplus Ratio Stood at \$0.75:\$1 as of 9/30/14, a Record Low (at Least in Recent History)**

# I.I.I. Will Release its First Report on Alternative Capital During Q1 2015

## ALTERNATIVE CAPITAL: PASSING FANCY OR PERMANENT FIXTURE?

*Forthcoming: Q1 2015*

Robert P. Harberg, Ph.D., CFCU  
President  
(212) 546-5529  
robh@iit.org

James Lynch  
Chief Actuary and Director of Research and Information Services  
(212) 546-9530  
jamekl@iit.org

Insurance Information Institute 110 William Street New York, NY 10038 212 546 5000

- Issue of alternative capital in (re)insurance has received increased attention in recent years
- Significant structural changes in property catastrophe reinsurance space
- Questions addressed include:
  - Sources of new capital
  - Reasons/Drivers of growth
  - New structures
  - Impact of major triggering event(s)
  - Impacts of higher interest rates
  - Cat bond yield compression

# Questions Arising from Influence of Alternative Capital

- **What Will Happen When Investors Face Large-Scale Losses?**
- **What Happens When Interest Rates Rise?**
- **Does ILS Have a Higher Propensity to Litigate?**
- **How Much Lower Will Risk Premiums Shrink/ROLs Fall?**
- **Will There Be Spillover Into Casualty Reinsurance?**
- **Will Alternative Capital Drive Consolidation?**

# **Commercial Lines Pricing Trends**

**Survey Results Suggest  
Commercial Pricing Has  
Flattened Out**

# Average Commercial Rate Change, All Lines, (1Q:2004–4Q:2014)

(Percent)

Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.  
Source: Council of Insurance Agents & Brokers; Insurance Information Institute

# Change in Commercial Rate Renewals, by Account Size: 1999:Q4 to 2014:Q4

Percentage Change (%)

Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.  
Source: Council of Insurance Agents and Brokers; Barclay's Capital; Insurance Information Institute.

# Cumulative Qtrly. Commercial Rate Changes, by Account Size: 1999:Q4 to 2014:Q4

1999:Q4 = 100

Despite several years of gains, pricing today for mid-sized accounts is where it was in late 2001 (around 9/11), suggesting additional rate need going forward, esp. in light of record low interest rates

Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.  
Source: Council of Insurance Agents and Brokers; Barclay's Capital; Insurance Information Institute.

# Directional Pricing Trend in Large Account P/C Renewals

Early 2009 through Early 2015

Few accounts are seeing increases

# Change in Commercial Rate Renewals, by Line: 2014:Q4

Percentage Change (%)

**Major Commercial Lines Renewals Were Mixed to Flat in Q4:2014; Commercial Auto and EPL Led the Way**

Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.  
Source: Council of Insurance Agents and Brokers; Insurance Information Institute.

# Performance by Segment

# Private Passenger Auto Combined Ratio: 1993–2016F

**Private Passenger Auto Accounts for 37% of Industry Premiums and Remains the Profit Juggernaut of the P/C Insurance Industry**

# Homeowners Insurance Combined Ratio: 1990–2015F

**Homeowners Performance in 2011/12 Impacted by Large Cat Losses. Extreme Regional Variation Can Be Expected Due to Local Catastrophe Loss Activity**

# Commercial Lines Combined Ratio, 1990-2015F\*

\*2007-2012 figures exclude mortgage and financial guaranty segments.

Source: A.M. Best (1990-2014F); Conning (2015F) Insurance Information Institute.

# Commercial Auto Combined Ratio: 1993–2015F

**Commercial Auto is Expected to Improve Only Slowly as Rate Gains Barely Offset Adverse Frequency and Severity Trends**

# Commercial Property Combined Ratio: 2007–2016F

**Commercial Property Underwriting Performance  
Has Been Volatile in Recent Years, Largely Due to  
Fluctuations in CAT Activity**

# General Liability Combined Ratio: 2005–2015F

**Commercial General Liability Underwriting  
Performance Has Been Volatile in Recent Years**

# Commercial Multi-Peril Combined Ratio: 1995–2015F

**Commercial Multi-Peril Underwriting Performance is Expected to Improve in 2013 Assuming Normal Catastrophe Loss Activity**

\*2014E-2015F figures are Conning figures for the combined liability and non-liability components..  
Sources: A.M. Best; Conning; Insurance Information Institute.

# Inland Marine Combined Ratio: 2004–2015F

**Inland Marine Underwriting Performance Has Been  
Consistently Strong for Many Years**

# **Growth Analysis by State and Business Segment**

**Post-Crisis Paradox?**  
***Premium Growth Rates Vary  
Tremendously by State***

# Net Premium Growth: Annual Change, 1971—2016F

(Percent)

\*Actual figure based on data through Q3 2014.

Shaded areas denote "hard market" periods

Sources: A.M. Best (historical and forecast), ISO, Insurance Information Institute.

# Auto & Home vs. All Lines, Net Written Premium Growth, 2000–2015F

While homeowners insurance has grown faster than auto over the past decade, auto is generally more profitable

# Direct Premiums Written: Total P/C Percent Change by State, 2007-2013

## Top 25 States

North Dakota was the country's growth leader over the past 6 years with premiums written expanding by 74.6%, fueled by the state's energy boom

# Direct Premiums Written: Total P/C Percent Change by State, 2007-2013

## Bottom 25 States

# Direct Premiums Written: PP Auto Percent Change by State, 2007-2013

## Top 25 States

# Direct Premiums Written: PP Auto Percent Change by State, 2007-2013

## Bottom 25 States

# Advertising Expenditures by P/C Insurance Industry, 1999-2013

\$ Billions

# Growth in Premiums, Capacity vs. Growth in Advertising Expenditures, 2000 – 2013

Average Annual Percent Change (%)

Growth in the  
“Supply” of insurance  
has exceeded  
“Demand” → Efforts to  
sell have intensified

Overall Growth in Ad Spending has greatly exceeded growth in capacity (policyholder surplus) or premium growth. This suggests that there are diminishing returns to advertising.

# Direct Premiums Written: Homeowners Percent Change by State, 2007-2013

## Top 25 States

### Growth Benchmarks: HO

US: 26.8%

# Direct Premiums Written: Homeowners Percent Change by State, 2007-2013

## Bottom 25 States

The collapse of the housing bubble hit CA, FL and NV hard, leading to the slowest growth rates in the US between 2007 and 2013

# Direct Premiums Written: Comm. Lines Percent Change by State, 2007-2013

## Top 25 States

# Direct Premiums Written: Comm. Lines Percent Change by State, 2007-2013

## Bottom 25 States

# Direct Premiums Written: Workers' Comp Percent Change by State, 2007-2013\*

## Top 25 States

\*Excludes monopolistic fund states: ND, OH, WA, WY as well as WV, which transitioned to a competitive structure during this period.

Sources: SNL Financial LC.; Insurance Information Institute.

# Direct Premiums Written: Worker's Comp Percent Change by State, 2007-2013\*

## Bottom 25 States

\*Excludes monopolistic fund states: ND, OH, WA, WY as well as WV, which transitioned to a competitive structure during this period.

% of GDP

# **The Affordable Care Act & Implications for P/C Insurance**

**The ACA Is Now Being Fully  
Implemented; Consequences for P/C  
Insurance Are Yet to Be Determined**

# Projected Number of People with No Health Insurance, 2013—2022\*

Millions

**The projected decline in the uninsured population is very sensitive to the enrollment rate under the Affordable Care Act**

\*Under age 65.

Sources: Centers for Medicare & Medicaid Services, Office of the Actuary at <http://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/NationalHealthExpendData/NationalHealthAccountsProjected.html> accessed 3/14/14; Insurance Information Institute.

# A Few Potential Impacts of the ACA on Workers Compensation

Issue	Concern	Contravening Argument
<b>Surge in People Covered by Health Insurance</b>	<ul style="list-style-type: none"> <li>• System is overwhelmed</li> <li>• MD shortage</li> <li>• Patient care adversely impacted</li> </ul>	<ul style="list-style-type: none"> <li>• Over time, people will have access to preventative care, improving the general health of the population</li> <li>• Greater use of PA's, etc.</li> </ul>
<b>Electronic Health Records</b>	<ul style="list-style-type: none"> <li>• Cost</li> </ul>	<ul style="list-style-type: none"> <li>• Computerization of patient data could help flag issues and improve risk management and improve patient outcomes</li> </ul>
<b>Claim Shifting</b>	<ul style="list-style-type: none"> <li>• Provider/patient may prefer claim handled via WC system</li> </ul>	<ul style="list-style-type: none"> <li>• Reduction in uninsured population reduces shifting</li> </ul>
<b>Reimbursement Rates</b>	<ul style="list-style-type: none"> <li>• Cuts in MC reimbursement rates could make docs less willing to take WC claims</li> </ul>	<ul style="list-style-type: none"> <li>• Impact would be short-lived. All MC-linked states already boost WC reimbursements</li> </ul>

# ACA Impact on WC May Occur via Changes in Rates Set by State Regulators

- WC rates often tied to Medicare but can change for reasons independent of this link
- There could be both positive and negative effects of a cut in Medicare rates on WC performance in states which tie reimbursement to Medicare
  - WC reimbursement rates would go down
  - Doctors may be unwilling to see WC patients:
    - 64% of Dr.'s surveyed said they would stop accepting new Medicare patients if planned rate cuts go through; some of these same doctors may also refuse WC patients if WC rates also decrease
- These effects would likely be short lived
  - All states which tie their fee schedules to Medicare already increase the Medicare rates to set WC rates, so any drop in the Medicare rates would likely be soon offset by a higher WC adjustment

# PPACA May Have Distinct Impacts on WC Depending on Claim Frequency/Severity

## Industry Portfolio by Claim Type

(Relative Volume by Claim Frequency & Paid Dollars)

## Potential ACA Impact

- Expanded coverage may shift some small claims to the health insurance system (+)
- Physician access problems could lead to indemnity increases and may bleed into the complicated cases (-)
- Preventative care and early record keeping decreases WC comorbidities (+)
- Soft tissue treatments, a large portion of "slow burn claims," may decrease in cost (+)
- No significant impacts

## 1. Could slow the growth in WC medical care costs

- IPAB recommendations and PCORI reports, plus Medicare changes, could have beneficial effects on cost and treatment effectiveness

## 2. Could ACA be first step in federal regulation of insurance products and markets?

- Will regulation like that requiring products to be priced to meet Medical Loss Ratios be applied to WC?
- Will cost-control mechanisms such as the Independent Payment Advisory Board be developed for WC?
- Will WC insurers lose their limited exemption from anti-trust laws that they have had under McCarran-Ferguson since 1945?

# Potential Impacts of the ACA on Medical Professional Liability

Issue	Concern	Contravening Argument
<b>Surge in People Covered by Health Insurance</b>	<ul style="list-style-type: none"> <li>• System is overwhelmed</li> <li>• Doctors spend less time on patients</li> <li>• Patient care adversely impacted</li> </ul>	<ul style="list-style-type: none"> <li>• Over time, people will have access to preventative care, improving the general health of the population</li> <li>• People are receiving care already via suboptimal channels</li> <li>• Less use of ERs</li> </ul>
<b>Electronic Health Records</b>	<ul style="list-style-type: none"> <li>• Digitization could create a treasure trove of data for plaintiff attorneys</li> </ul>	<ul style="list-style-type: none"> <li>• Computerization of patient data could help flag issues and improve risk management and improve patient outcomes</li> </ul>
<b>MPL Claim Severity</b>	<ul style="list-style-type: none"> <li>• More large verdicts will</li> </ul>	<ul style="list-style-type: none"> <li>• ACA will help contain system costs</li> </ul>

# **U.S. Insured Catastrophe Loss Update**

**2014 Experiencing Below Average CAT  
Activity Following a Welcome Respite in
