## America's Insurers:
for Customers, Communities, and Employees

The insurance industry is applying forward-thinking solutions to take care of its customers, communities, and employees during the COVID-19 crisis

Market challenge: An industry campaign

The Future of American Insurance & Reinsurance (FAIR) campaign launched in May and has served as a source of education surrounding pivotal industry activity, including Congressional hearings, White House roundtables, state legislation, and media stories.

With a separate website, valuable explanatory assets, stakeholder outreach, and digital promotions, this integrated campaign provides the Triple-I with a separate platform and voice to present information in a digestible, influential manner to key audiences.

The campaign takes on overarching industry issues (i.e. business interruption) and emphasizes its essential role in supporting and rebuilding communities in these uncertain times.

www.fairinsure.org
FAIR Campaign Educated Media and Created Positive Media Coverage for Insurers

- Through education and outreach to reporters, FAIR has been able to better contain spikes in negative coverage on pandemic-related business interruption lawsuits.
- FAIR campaign also prompted a steady stream of content highlighting favorable court rulings for insurers and advocating for government-led solutions to pandemic insurance.
- Given the decrease in BI coverage volume, FAIR will transition to other emerging industry issues in 2021.

Source: Meltwater.
A better place: FAIR guiding principles: A defined perspective on potential policy solutions

Proposed solutions must:

- Maintain the federal government as a primary provider of relief, reflecting the reality that pandemic risks are not privately insurable.

- Provide widely accessible relief payments to businesses in a fast and efficient manner once a pandemic is declared by the government, with minimal chance of abuse.

- Protect businesses from losses, and incentivize businesses to retain employees, without jeopardizing insurers’ existing commitments.

Given their universal scope, pandemics are largely uninsurable. Therefore, only the government has the financial capacity to provide the relief small and large businesses need to weather this crisis.

**Calendar Year Written Premium and Net Combined Ratio Projections**

**2021 Commentary**

- A growing economy means more exposures to insure – good news
- Hard market will persist particularly in lines hit hard by social inflation, like commercial auto, D&O and general liability
- Q1 Texas storms a bumpy start for catastrophes this year, homeowners will struggle with profitability

2020/2021 Commentary

• The combined ratio in 2020 was 107.4, thanks to lots of hurricanes, convective storms, wildfires and the occasional derecho

• First quarter rarely has mega-cats, so the 2021 Texas freeze meant losses were about $10 billion more than the normal Q1

Watch for:

Another above-average hurricane season is expected

Data sources: NAIC data sourced through S&P Global Market Intelligence, MarketScout, Blue Chip Economic Indicators, Congressional Budget Office, PCS, Aon, Munich Re, Energy Information Agency, FRED (Federal Reserve Bank of St. Louis).

Analysis: Insurance Information Institute, Milliman.
**2020/2021 Commentary**

- Excellent 2020 results from changes in driving patterns
- Through Q1 2021 miles driven remained about 15 percent below pre-pandemic levels. Bad driving behaviors picked up when the roads were empty.

**Watch for:**
Cars now contain more expensive parts and there are supply chain issues in getting parts.

**2020/2021 Commentary**

- Liability loss ratios deteriorated from the third to the fourth quarter of 2020.
- Projected combined ratio for 2021 will be 106.1. Thanks to the continued hard market, that’s better than 2019.

Watch for:

- Adverse development issues

Data sources: NAIC data sourced through S&P Global Market Intelligence, MarketScout, Blue Chip Economic Indicators, Congressional Budget Office, PCS, Aon, Munich Re, Energy Information Agency, FRED (Federal Reserve Bank of St. Louis).

2020/2021 Commentary

- 2020 had exposure from nat cats: hurricanes, wildfires, tornadoes, an enormous derecho, and as well, social unrest.
- A slow improvement in office vacancies is in the cards for commercial real estate.

Watch for:
Drought conditions will bring more wildfires in the West.
Insured Cat Losses Are Increasing At An Alarming Rate – Nearly 700% Since 80’s
