- Agents/Brokers, Company Representatives
- Consumers
- Claims Adjusters
Flooding

Background

- Flooding is the most common and costly natural disaster in the United States, causing billions in economic losses each year. Most U.S. natural disasters declared by the president involve flooding.

- There is no coverage for flooding in standard homeowners or renters policies or in most commercial property insurance policies.

- Coverage is available in a separate policy from the National Flood Insurance Program (NFIP) and from a few private insurers.

- Despite efforts to publicize this, many people exposed to the risk of floods still fail to purchase flood insurance.
Flood Insurance

The Basics

Flood insurance covers direct physical losses by flood and losses resulting from flood-related erosion caused by heavy or prolonged rain, coastal storm surge, snow melt, blocked storm drainage systems, levee dam failure or other similar causes.

Homes are covered for up to $250,000 on a replacement cost basis and the contents for up to $100,000 on an actual cash value basis. (Excess flood insurance is available in all risk zones from some private insurers for NFIP policyholders who want additional coverage or where the homeowner’s community does not participate in the NFIP.)

Coverage for the contents of basements is limited. Coverage limits for commercial property are $500,000 for the structure and another $500,000 for its contents.
A 2016 poll by the Insurance Information Institute found that 12 percent of American homeowners had a flood insurance policy, lower than the 14 percent who had the coverage in 2015.

The percentage of homeowners with flood insurance was highest in the South, at 14 percent.

Thirteen percent of homeowners in the Northeast had a flood insurance policy,

10 percent of homeowners in the West had a flood insurance policy,

while 8 percent of homeowners in the Midwest had flood insurance.
I.I.I. Poll: Flood Insurance

The Take-up Rate Continues a Slow Decline.

Flood Insurance by Year and By Region

Homeowners With Flood Insurance

- 2010: 10%
- 2011: 14%
- 2012: 13%
- 2013: 13%
- 2014: 13%
- 2015: 14%
- 2016: 12%

Homeowners With Flood Insurance by Region (2016)

- Midwest: 8%
- Northeast: 13%
- South: 14%
- West: 10%
Consumer Understanding of Home and Flood Insurance

Good News and Bad News

**Key Findings**

Two broad conclusions can be drawn from the I.I.I.'s survey. First, **the majority of homeowners do understand the basics of their homeowners policy.** They recognize that they will be covered if their house is damaged by a fire, if property is stolen from their home or if someone is injured on their property (Fig. 1).

But second, **homeowners have gaps in their knowledge of their coverage.** For example, many policyholders do not recognize that most flood damage is not covered by their basic homeowners insurance.

**Fig. 1**

<table>
<thead>
<tr>
<th>Percentage of Homeowners Who Knew Key Perils Are Covered</th>
<th>Misunderstanding of Flood Damage Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>91%</strong> Fire damage</td>
<td><strong>43%</strong> of Homeowners Incorrectly Believe Damage From Heavy Rain Flooding Is Covered Under Their Standard Insurance Policy</td>
</tr>
<tr>
<td><strong>79%</strong> Theft from house</td>
<td></td>
</tr>
<tr>
<td><strong>69%</strong> Medical Costs for Someone Injured on Property</td>
<td></td>
</tr>
</tbody>
</table>

**Most homeowners understand the basics In a home insurance policy, but don’t understand Water damage and flooding**
Most homeowners understand the key provisions of a standard homeowners insurance policy. A majority of homeowners recognize that their policy will provide coverage for damage caused by fire, wind and hail. Most also know that items stolen from their house are covered (Fig. 7).

Fig. 7

Recognizing Covered Perils

- Fire: 91%
- Theft: 79%
- Wind: 79%
- Hail: 73%
- Burst pipes: 71%
Most Know that there is ALE Coverage in a Home Insurance Policy

No ALE in Flood Insurance Policy – Another Source of Confusion

Additional Living Expenses (ALE) Coverage

48% Homeowners who recognize that their policy provides ALE coverage

27% Homeowners who don’t think they have coverage

Standard homeowners insurance does include ALE coverage.
Public is confused by flood insurance Coverage

Misperceptions Abound

**Misperceptions About Flood Coverage**

- **43%**
  Homeowners who think that standard homeowners insurance covers damage caused by flooding from heavy rain

- **28%**
  Homeowners who think hurricane storm surge flood damage is covered

*Most flood damage is NOT covered by standard homeowners insurance.*
Misconceptions Regarding Flood Coverage

Troubling Results

[Image: Bar chart showing the percentage of homeowners who incorrectly believe various flood events are covered by their standard policy.]

- Heavy rain flooding: 43%
- Hurricane storm surge: 28%
- Tsunami storm surge: 18%

Percentage of homeowners who incorrectly believe these perils are covered under their standard policy.
Reason for Confusion

What can be done?

Confusion about flood coverage may arise from the fact that some types of water and storm-related damage are covered by a standard homeowners policy.

For example, most homeowners insurance includes coverage for damage caused by wind-driven rain, burst pipes and water leaking into your house because of a roofline ice dam.

The insurance industry has an opportunity to serve its customers and improve consumer understanding of its products and services by increasing educational outreach to homeowners.

Consumer advocates and the media can also help close the knowledge gap by bringing attention to the need for homeowners to learn more about their insurance coverage and seek professional guidance when they purchase insurance.
