

Winter Storm Recovery Watch

With millions now recovering from February 2021's record-breaking winter storm, there are some important issues for consumers to look out for.

Fraudulent Repairs

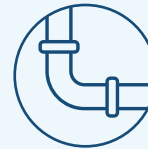

- Make sure contractors are licensed and bonded in your state of residence.
- Get multiple quotes and stay alert for high pressure tactics by contractors.

Misleading Attorneys

- Plaintiff's attorneys often seek to recruit consumers through advertisements and other attempts to mislead them in pursuing costly litigation.
- These tactics have proven to benefit attorneys more than consumers.

Unknown Damage

- Water seepage and mold can be undetected initially.
- Consult service providers to help detect this kind of damage early.

Contact your insurance professional with any questions or concerns.
